

Simactricals Raptor

Up to 8 modules with 3.3kW/module

Specifications

- Charging up to 44A @ 415V, Three phase.
- Maximum output of 28.8 kW (3.6 kW/module).
- Wall mount box with display.
- IP67 protection for indoor and outdoor application.

Simactricals Private Limited

About Us

Simactricals is a cutting-edge technology company at the forefront of innovation in wireless charging for electric vehicles, unmanned aerial vehicles and autonomous bots.

Our Mission

At Simactricals, we are committed to deliver advanced and sustainable solutions that address industries' complex challenges. Our experienced engineers and researchers leverage the latest technologies to create safe, reliable, and efficient products while reducing the carbon footprint and promoting sustainable development.

Value Proposition

Durable and Solid State Technology

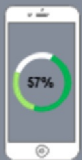

Autonomous and Hands Free Charging

Cross Compatible

Modular and Scalable Design

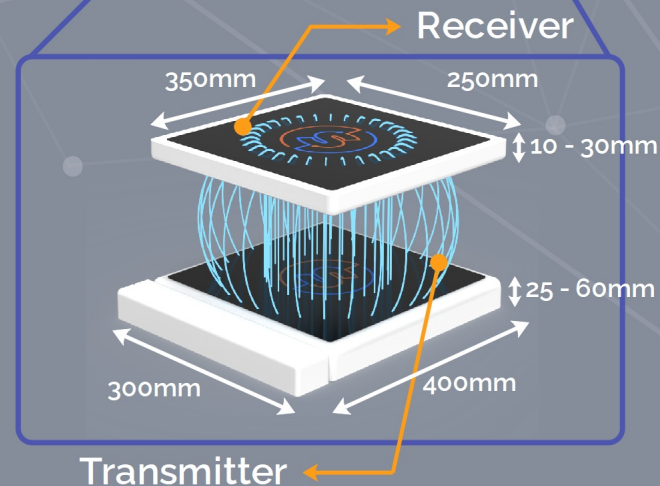

Phone App and Health Metrics

Efficient Charging

Our Products

Simactricals Turtle

Specifications

- Compatible with 2 wheelers & autonomous bots
- Ground Clearance
- Charging up to 16A @ 230V, Single phase.
- Maximum output of 3.6 kW.
- One 16A 3 pin socket.
- Wall mount box with display.
- IP67 protection for indoor and outdoor application.

Simactricals Rabbit

Up to 4 modules with 3.3kW/module

Specifications

- Charging up to 20A @ 415V, Three phase.
- Maximum output of 14.4 kW (3.6 kW/module).
- One 32A 5 pin industrial socket.
- Wall mount box with display.
- IP67 protection for indoor and outdoor application.
